Description

Dow Corning offers more than just quality products. At Dow Corning Development Centers in Europe, Asia and North America, we apply our global industry knowledge and development expertise to provide custom solutions for enhancing the performance and reliability of your pressure sensitive products. Whether you need advanced lab resources or information and support, we can help. Working closely with your own product development team, Dow Corning Development Group experts can modify existing products or develop new products or product forms to match your needs.

Benefits

Proven Solutions – Analytical Services and Development Centers are linked to provide you with complete testing and application solutions.

Industry Expertise – Dow Corning has experience with pressure sensitive industry practices and standards that affect you, in your industry.

Technology – Our substantial intellectual property assets enable development of timely, effective solutions for your advanced and growing needs.

Globality – Wide-ranging capabilities that span the globe provide coverage wherever your needs exist – with sales offices, manufacturing sites and science and technology laboratories around the world.
