Licensing of Patented Technology

Description

Utilize assets that already exist by incorporating our technology into your products. Licensing patented technology can provide significant time and cost savings – and eliminate duplicity of effort.

Put Dow Corning experience to work for you. From development assistance to product testing, Dow Corning materials technology is available to you. Improve your existing product, or develop and evaluate compatible technologies for new products, with the assistance and the technologies of a market leader.

Benefits

Proven Solutions – Analytical Services, Environmental Health Centers and Development Centers are linked and connected with our intellectual property assets to provide you with complete testing and application solutions.

Industry Expertise – Dow Corning has experience with pressure sensitive industry practices and standards that affect you, in your industry.

Technology – Our substantial intellectual property assets enable development of timely, effective solutions for your advanced and growing needs.

Globality – Wide-ranging capabilities that span the globe provide coverage wherever your needs exist – with sales offices, manufacturing sites and science and technology laboratories around the world.
